

# Workplace health risk mitigation

## Adapt COVID-19 health guidelines to your business

Public health experts agree that hygiene and physical distancing guidelines won't be lifted any time soon. While many businesses have already implemented measures to protect their staff and customers, these may not be optimal for the company's unique work environment.

Through virtual delivery, BDC's advisory services can quickly help you define the right measures to prevent and control health risks in your workplace.

### Learn what you need to do internally to protect your employees and customers

BDC helps you:

- Assess your current hygiene and physical distancing measures
- Swiftly develop new operating procedures to reduce health risk in your workplace
- Coach managers and key process owners on new procedures
- Build an action plan to implement effective COVID-19 preventive measures

### Our advisors assess your workplace to help you implement the right:

**Physical controls** to limit staff contact, separate workflows, increase sanitation

**Personnel controls** to ensure proper hygiene and distancing, monitor employee health, and manage COVID-19-positive tests

**Organizational controls** to monitor compliance, facilitate COVID-19 communication and coordination, secure critical supplies, and sanitize high-risk areas

## Here's how we'll work together

### Gain knowledge

**We transfer best practices, so you become self-sufficient**

- Understand how to apply physical distancing according to your workplace layout
- Learn proper use and handling of personal protective equipment (PPE)
- Discover the right personal hygiene and handling practices for your business activities
- Find out how to properly clean and disinfect your workplace
- Learn how to manage new controls effectively

### Trust our expertise

**We provide you with proven strategies tailored to your business**

- Health-risk assessment report identifying critical gaps in your environment
- COVID-19 action plan to address short-term and long-term health and safety measures

### Get support

**We provide guidance as you implement the solutions**

- Obtain training material on the preventive measures
- Get guidance as you execute, monitor, and adjust plans as required

## Expert advice that's grounded in reality

Our advisors understand the realities of running a business and have helped countless entrepreneurs pull through challenging periods and plan their recovery.

### You can count on us for:

- Practical, proven strategies
- Advice adapted to your needs
- Remote implementation
- Accelerated timelines
